ABOUT IMPERIAL MAILBOX SYSTEMS

Curb Appeal. These two words are often repeated during the planning stages of a residential development. Guidelines and restrictions are placed on homebuilders and owners to ensure the quality and aesthetic value of each home constructed. The shutters, trim, doors, even the lawns of each home have carefully outlined procedures to protect the value and pattern of the development. Imperial Mailbox Systems continues this careful attention to detail in this beautification and standardization process by providing the highest quality U.S.P.S. Approved mailboxes and D.O.T. Approved street signage.

As members of several national housing organizations, such as the National Association of Home Builders, National Golf Foundation, and the Community Associations Institute, Imperial Mailbox Systems has provided planned developments and communities across the United States with quality cast-aluminum mailboxes, street signage, and patio light poles. Our selection, illustrated in this catalog, is designed to complement and standardize all of your curbside and traffic sign needs.

It is our mission to serve you by providing U.S.P.S. approved mailboxes, and matching D.O.T. approved street signs. Leading the industry, Imperial has proven itself through partnerships with both organizations, and have a proven ISO 9001:2000 compliant system to continue to improve our products, services, and customer satisfaction.

Contact our customer service department today at 1-800-647-0777, or visit our website online at www.imperialmailboxsystems.com, for more information about how Imperial products are right for your project, or to find more information about U.S. Postal or D.O.T. standards and requirements. Give yourself the opportunity to realize the added value of your development’s curb appeal with mailboxes, street signs, and light poles from Imperial!

TERMS AND CONDITIONS

Shipping Terms: All prices are F.O.B. point of origin. Freight charges must be prepaid at time of order placement. Freight collect requires prior approval.

Delivery: Most items in this catalog are stocked and ready to be shipped within (5) business days. Custom and large orders may vary in shipping times (between 2-8 weeks, please call for a quote), and may be drop shipped to various locations. Specific shipping dates are not guaranteed. Most items ship via FED-EX ground or FED-EX Freight. Before accepting any shipment, the extent of any damages or shortages should be noted in writing on the bill of lading before you sign for the shipment. Claims are the responsibility of the shipper.

Materials: All descriptions and specifications contained in this catalog were in effect at the time of publication. Imperial Mailbox Systems reserves the right to change specifications and/or designs without notice or incurring liability.

Installation: Most products require minor assembly. Consult local postal or D.O.T. authorities regarding any local requirements.

Quotations: Individual quotations are valid for (30) days. Imperial Mailbox Systems reserves the right to alter a quote at any time and for any reason, as well as the right to decline an order for any reason.

Dealers: Imperial Mailbox Systems primarily sells through our dealers: call 800-647-0777 to find the nearest dealer in your area. Dealers are not employed by Imperial Mailbox Systems.

Returns: Returned products will not be accepted without prior authorization from Imperial Mailbox Systems, and must be shipped prepaid to Imperial Mailbox Systems. All returns are subject to a 25% restocking fee. Items must be inspected and reported of any nonconforming issue within (7) business days. Shipping charges are non-refundable.

Copyright: All catalogue products, graphics, and text are © 2017 Imperial Mailbox Systems. ALL RIGHTS RESERVED.

Warranty: Imperial Mailbox Systems provides a (1) year limited warranty to the original purchaser covering defects in material and workmanship if reported in writing to Imperial Mailbox Systems within (1) year of the delivery date. Whether a condition is a defect is determined solely by Imperial Mailbox Systems. This warranty is limited to the cost of the products, and does not include installation fees, transportation neglect or costs, vandalism, misuse, or alterations by the customer. It is the option of Imperial to replace or repair defective products. Imperfections in sand cast products are a part of the natural aesthetics and not considered a defect. Wear and tear is not covered. Purchaser assumes all liability and risk upon purchase of goods.
September 30, 2002

John H. Clark, Jr.
Imperial Mailbox Systems
3901 Norris Lane
Millbrook, AL 36054-2433

Dear Mr. Clark:

The final review of your mailbox models: 001-01, 001-04, 001-06, 001-07, 001-08, and 002-00 have been completed in accordance with section 4.1.3 of USPS-STD-7B. It has been determined that these mailboxes are in compliance with the requirements of USPS-STD-7B. Therefore, with this notification, you are authorized to manufacture and market these mailboxes as approved by the United States Postal Service (USPS).

Enclosed is one set of the approved drawings which have been stamped as follows: USPS CERTIFIED DRAWING, Issue No. 1, May 16, 2002. The enclosed drawings represent the baseline design for this control and USPS quality control. Any future changes to these drawings must be reviewed and approved by the USPS prior to production implementation.

If you have any questions, please contact Don Irwin at (703) 280-7287.

Sincerely,

James W. Buie
IP Business Manager

Enclosure

cc: C. Bravo, R. Gamble, S. Landi
May 28, 1993

U.S. Department of Transportation
Federal Highway Administration

Refer to: HNG-14/SS-35 (Revised)

Mr. John H. Clark
Imperial, Inc.
3901 Norris Drive
Millbrook, Alabama 36054

Dear Mr. Clark:

Thank you for your May 4 letter to Mr. Thomas O. Willett requesting Federal Highway Administration’s (FHWA) acceptance for your company’s aluminum pipe breakaway sign support. You referenced our Geometric and Roadside Design Acceptance Letter SS-28 dated May 26, 1992, which reported on small sign support testing conducted in “weak” soil and sponsored by the Florida Department of Transportation (DOT). In that letter, we accepted as breakaway 89-mm (3-in) diameter, 6061-T6 alloy aluminum tubes of 4.75-mm (0.187-in) thickness when no more than one sign support was used within a 7-foot span. The posts pulled out of the ground partially or completely, allowing the vehicle to gradually come to a stop. The signpost that you wish to use has a diameter of 60-mm (2.375 in) and a wall thickness of 5.54-mm (0.218 in). The two signposts are compared in the table below:

<table>
<thead>
<tr>
<th>Sign Post</th>
<th>Florida DOT</th>
<th>Imperial, Inc.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Diameter</td>
<td>89 mm (3.5 in)</td>
<td>60 mm (2.375 in)</td>
</tr>
<tr>
<td>Wall Thickness</td>
<td>4.75 mm (0.187 in)</td>
<td>5.54 mm (0.218 in)</td>
</tr>
<tr>
<td>Alloy</td>
<td>6061-T6</td>
<td>6063-T6</td>
</tr>
<tr>
<td>Tensile Strength</td>
<td>310 Mpa (45 ksi)</td>
<td>186 Mpa (27 ksi)</td>
</tr>
<tr>
<td>Yield Strength</td>
<td>275 Mpa (40 ksi)</td>
<td>145 Mpa (21 ksi)</td>
</tr>
<tr>
<td>Cross Section Area</td>
<td>1257 mm2 (1.951 in2)</td>
<td>948 mm2 (1.477 in2)</td>
</tr>
</tbody>
</table>

In addition to the Florida DOT sponsored testing to which you referred, earlier tests of 100-mm (4-in) diameter thin-walled aluminum tubes were conducted in “strong” soil. These posts, which were fitted with anti-twist hardware below the groundline, fractured upon impact. They were found to be crashworthy.

Because your company’s proposed aluminum tube sign support is a smaller diameter and made of a weaker allow than posts already found to be crashworthy in either strong soil or weak soil, we find the 60-mm diameter, 5054-mm thick wall tube of 6063-T6 aluminum to be acceptable for use on Federal-aid highway projects when requested by a highway agency. It has also been determined (reference FHWA acceptance letter SS-15) that your 3-inch and 4-inch diameter posts, each with a wall thickness of 0.125 inches and constructed from aluminum alloy 6061-T6, are accepted by FHWA. We would recommend, however, that a soil plate or other sort of anti-rotation device be installed below ground. This would have dual benefits of preventing the signpost from rotating, and improving the breakaway performance, especially in weak soil.

Our acceptance is limited to the breakaway characteristics of the post and does not cover its structural features. Presumably, you will supply potential users with sufficient information on structural design and installation requirements to ensure proper performance. We anticipate that the States will require certification from Imperial, Inc., that the hardware furnished has essentially the same chemistry, mechanical properties, and geometry as the post in question, and that it will meet the FHWA change in velocity requirements.

Sincerely yours,

Lawrence A. Staron, Chief
Federal-Aid and Design Division

Federal Highway Administration
